GENESIS[®]
Bowl Your Game™

GENESIS[®] Ignitor™ Flash

You don't have to throw it 88 mph to get the gigawatts flowing in this high powered release. We've fused the **Endura-Tac™** covers of the **Ignitor™ Thrust & Blast** with the symmetric **Power Cube™ CR** core from the **Ignitor™ Burn** to put you in control of your bowling future. So be prepared to flash some scores with this amped up, energy transferring machine.

Ball Motion - The **Endura-Tac™ Hybrid** cover gets the ball flowing through the heads, while the moderate differential of the **Power Cube™ CR** core acts as a capacitor in controlling the entry angle from the mid-lane to the back end. This allows the combined core/cover combo to power up a controlled burst of energy that gets the ball rolling nicely through the pins.

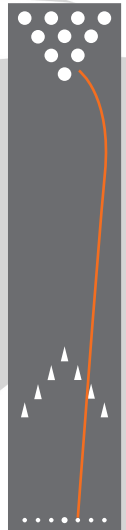

Weight	16#	15#	14#	13#
